PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience developing full-stack web applications and AI-enabled solutions. Proficient in C++, Python, JavaScript, Node.js, Express.js, SQL, and modern web technologies. Currently expanding expertise in cloud computing, Docker, Kubernetes, CI/CD, and AWS through structured coursework and practical learning.

EDUCATION

Maharana Pratap Group of Institutions	2025 – 2029
B.Tech. in Computer Science and Engineering – Artificial Intelligence & Machine Learning	Kanpur, Uttar Pradesh
St. Xavier's Senior Secondary School	2025
Class XII – Central Board of Secondary Education (CBSE), 76%	Fatehpur, Uttar Pradesh
St. Xavier's Senior Secondary School	2023
Class X – Central Board of Secondary Education (CBSE), 76%	Fatehpur, Uttar Pradesh
University: Dr. A.P.J. Abdul Kalam Technical University (AKTU) CGPA: 7.21	

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript, SQL
Web Development: HTML5, CSS3, Bootstrap, EJS, Responsive Web Design
Backend Development: Node.js, Express.js, REST APIs, CRUD Operations, MVC Architecture
Databases: MySQL, SQL, Database Management
AI & Data Science: Artificial Intelligence, Machine Learning, NumPy, Pandas, Matplotlib, Data Analysis
Computer Science: Object-Oriented Programming, DBMS, Problem Solving, Time Complexity
Developer Tools: Git, GitHub, VS Code, GitHub Pages, npm
Currently Learning: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Cloud Computing

PROJECTS

MediKiosk – AI-Powered Clinical Intake Platform <i>Major Team Project</i>	2026 – Present
– Collaborating on a team-based full-stack healthcare platform that digitizes patient intake and streamlines pre-consultation clinical workflows. – Implementing voice- and touch-based multilingual interfaces to capture patient history, symptoms, medications, allergies, and medical documents. – Integrating AI-enabled input processing to organize patient information into structured clinical summaries for physician review. – Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, EJS, SQL, Python, AI/ML, Voice Processing APIs	
QR-Based Gate Pass Management System <i>Major Team Project</i>	2026 – Present
– Developing a full-stack campus management system to digitize student and visitor entry and exit processes. – Implementing QR-based verification and approval workflows to replace manual gate-pass records and streamline entry validation. – Building interfaces for student records, visitor information, gate-pass requests, approvals, and verification history. – Technologies: HTML5, CSS3, JavaScript, Node.js, Express.js, EJS, SQL, QR Code Technology	
Placify – Placement Prediction Platform <i>Live Demo</i>	2026
– Developed a responsive web application for collecting student information and presenting placement-related predictions through an interactive interface. – Designed a user-friendly frontend using HTML5, CSS3, and JavaScript with responsive layouts and interactive components. – Structured the application to support future integration of backend services and predictive analytics. – Technologies: HTML5, CSS3, JavaScript	

LEADERSHIP & ACTIVITIES

Nexus Campus Ambassador Program	2026 – 2027
Campus Ambassador	
Abhyudaya Club	2025 – Present
Executive Member	Maharana Pratap Group of Institutions

ACHIEVEMENTS

- Secured **2nd Place** in a college-wide Business Pitch Competition by presenting an innovative business idea before a panel of judges.
